

The Sustainable Village

Population to be Served

- One third of our villagers will be community members who are currently homeless.
- One third of our villagers will be community members who are on the edge financially, and are likely to face harder times ahead.
- One third of our villagers will be community members who simply have a passion for the success of the project.
(Proportions may evolve over time to serve existing need.)
- There will also be dedicated area for people to camp who intend to stay for only a limited time and fit our target population

TSV Will be a Place:

- To learn and teach the arts of low cost, environmentally sound, sustainable living.
- For people who desire an emotionally supportive environment, or perhaps the help of others, to recover from most forms of trauma.
- Where members of the wider community may come and volunteer some time and in exchange for anything from vegetables to an array of other goods and services.
- That does not place a demand on already limited, existing low income housing or living wage employment opportunities.
-

Main Features

- About 25% the cost over other long term options, and self-sustaining after 5 +/- years
- May be started on a shoe string or with a major grant, no ongoing funding necessary after 5 +/- years
- May be scaled up to meet existing and future need, due to the desirability and affordability of the approach
- TSV is a place to sustainably and collaboratively produce our own necessities of life
- TSV is a place that utilizes its infrastructure to facilitate a range of cottage industries to earn funds to cover TSV costs and funds for villagers

THE SUSTAINABLE VILLAGE

Designed by Gio Coelho & Jayme Delson Drafted by Gio Coelho

How will this help the wider community?

- Less homeless
- Better appearance of the city
- Tourism
- Economic development
- Media coverage/ status
- Decreased crime rate and increased safety
- More housing options
